

Instructions for Completing the Child Outcomes Summary Form

The Child Outcomes Summary Form asks you to consider and report on what is known about how this child behaves across a variety of settings and situations. Children are with different people (for example, mother, big brother, babysitter) and in different settings (for example, home, grocery store, playground). The purpose of the summary is to get an overall picture of how the child behaves across the variety of people and settings in his or her life. For each of the three summary questions, you need to decide the **extent to which the child displays behaviors and skills expected for his or her age** related to each outcome area. Use the information on the following pages to help you answer the questions.

Directions:

- Circle only **one** number for each outcome. Definitions for scale points 7, 5, 3, and 1 are provided at the end of the instructions. If the child's functioning falls between two of the defined points, select the number in between (e.g., 4)
- If this form has been completed previously for the child, answer the question in the right column by checking yes or no.

To Help You Decide on the Summary Answer:

- Answers are expected to take into account the child's functioning across a full range of situations and settings. Therefore, information from many individuals in contact with the child could be considered in deciding on an answer. These may include (but not be limited to): parents and family members, caregivers or child care providers, therapists, service providers, case managers, teachers, and physicians.
- Many types of information could be considered in selecting an answer. These may include (but are not be limited to): parent and clinical observation, curriculum-based assessments, norm-referenced assessments, service provider notes about performance in different situations, and progress and issues identified in the IFSP/IEP or individualized planning process.
- Answers should reflect the child's current functioning across the typical setting and situations that make up his/her day. Answers should convey the child's **typical** functioning across typical settings, *not* his/her capacity to function under ideal circumstances.
- If assistive technology or special accommodations are available in the child's everyday environments, then the answer should describe the child's functioning using those adaptations. However, if technology is only available in some environments or is not available for the child, rate the child's functioning with whatever assistance is commonly present. Answers are to reflect the child's **actual** functioning across a range of settings, *not* his/her capacity to function under ideal circumstances

Additional Information

The outcomes reflects several beliefs about young children:

- It is important that all children be successful participants in a variety of settings both now and in the future. Achieving the outcomes is key to being successful participants.
- Programs for young children and their families are working to ensure that all children will have the best possible chance of succeeding in kindergarten and later in school – even though school might be several years off for some children. Children who have achieved the outcomes prior to kindergarten entry have a high probability of being successful in kindergarten.
- Learning and development occur continuously in the years preceding kindergarten. There is much variation in how children develop but children whose development is consistently below what is expected for their age are at risk of not being successful in kindergarten and later school years.
- For many children, the Outcomes Summary Form questions will be answered more than once. The hope is that, with time, many children will show good progress and achieve a higher rating. The goal of high quality early childhood services is to help children develop and learn to the best of their abilities. For many children, good services will help them get a higher answer in the future.

Additional information about the 3 outcomes is contained in the paper entitled "Additional Information about the Child Outcomes".

Note: The Outcomes Summary was not designed to determine eligibility for services. It would be inappropriate to use it in this way.

Definitions for Outcome Ratings

Completely <i>means:</i>	7	<p>Child shows behaviors and skills expected for his or her age in all or almost all everyday situations that are part of the child's life.</p> <ul style="list-style-type: none"> Behavior and skills are considered typical for his or her age.
	6	Between Completely and Somewhat
Somewhat <i>means:</i>	5	<p>Child shows behavior and skills expected for his or her age some of the time across situations.</p> <ul style="list-style-type: none"> Behavior and skills are a mix of age appropriate and not appropriate. Behavior and skills might be described as more like those of a slightly younger child. Some behaviors or conditions might interfering with the child's capability to achieve age-expected behavior and skills.
	4	Between Somewhat and Emerging
Emerging <i>means:</i>	3	<p>Child does not yet show behaviors and skills expected of a child of his or her age in any situation. Child's behaviors and skills include immediate foundational skills upon which to build age expected skills.</p> <ul style="list-style-type: none"> Behaviors and skills might be described as more like those of a younger child. Some behaviors or conditions might be interfering with the child's capability to achieve age-expected behavior and skills.
	2	Between Emerging and Not Yet
Not yet <i>means:</i>	1	<p>Child does not yet show behaviors and skills expected of a child his or her age in any situation. Child's skills and behaviors also do not yet include any immediate foundational skills upon which to build age expected skills.</p> <ul style="list-style-type: none"> Child's ways of forming and maintaining social relationships might be described as more like those of a much younger child. Some behaviors or conditions might be seriously interfering with the child's capability to achieve age-expected behaviors and skills.
